

The Sierra Chart platform necessitates a paid license. If you lack an account with Sierra Chart, you can establish one here.

Furthermore, you will be required to cover the cost of the Denali Exchange feed to access precise historical data. For further details on this process, please refer to the Sierra Chart website.

Download the most recent Sierra Chart version. Install the platform and log in to your Sierra Chart account when prompted. This account is the one created on the Sierra Chart website.

After logging into the platform, navigate to File > Data/Trading Service Settings. Under Selected Current Service (list), choose Rithmic Direct - DTC [trading] from the drop-down menu, then click A to apply.

Choose Rithmic Trading-Chicago Area-nonaggregated from the drop-down menu under Server (List) and click A to confirm.

In the Trading Username and Password fields, input your trading account details as specified in the login email.

The identical username and password are used for both market data and historical data access.

Apply all changes, then close the settings window. To establish a proper connection, ensure that the simulation (sim) mode is disabled. Navigate to Trade > Trade Simulation Mode. If the checkbox is selected, kindly deselect it.

To establish a connection, navigate to File > Connect to Data Flow. The status bar located at the top left corner will change to green once you have logged into your trading account.

Ensure that this section is deactivated. In this instance, the simulation is enabled, so you will need to click on it to engage in actual trading.

Commissions and fees do not appear automatically in the income statement (P&L) for Sierra Chart users. To modify this setting, follow the steps below:

Navigate to Global Settings > Symbol Settings.

Choose the symbols or products you trade.

Click on "Round Turn Commission" in the Settings section located at the top right.

Select "Custom" under "Round Turn Commission" and input the commissions for the desired products.

After customizing all your products for trading, you may click "OK" to close the settings window.
